1 Introduction

This document is created to outline all the features included in the Ohio Fire Incident Reporting Management System (OFIRMS). The document is a reference/manual for software vendors who are using the OFIRMS System.

1.1 Overview

The software vendors can generate flat files to report fire incidents for the fire departments of Ohio State Fire Marshal. The guidelines to generate such files were published by the National Fire Incident Reporting System (NFIRS), review the <u>Reference</u> section for reference URLs. All vendors currently working with Ohio State's fire departments and new vendors must go through the registration steps provided in this document.

The below steps and diagram describe the registration process at a high level:

- 1. Register with the OFIRMS system and get approval from the Fire Prevention Bureau (FPB) to test flat files in the OFIRMS Test Environment.
- 2. Test the incident files, if needed fix the issues, and send the files to the bureau for review.
- 3. Once the FPB validates the flat file and provides the approval, the vendor needs to send a request to the fire department to get associated with them.
- 4. The fire department chief will review the request and provide approval for the vendor's request.
- 5. Vendor will start generating incident flat files on behalf of the fire department.
- 6. Every month, either the vendor or fire department submits the incidents to the OFIRMS system.

Note: A vendor must be approved by NFIRS and have an NFIRS Vendor Identification Number before starting the registration process with the OFRIMS system.

1.2 Environment Details

- 1.2.1 Production Version
 - Web Portal <u>https://sfmengage.com.ohio.gov</u>

2 Vendor Registration Steps

The Ohio Fire Incident Reporting System (OFIRMS) system is accessible to registered users only. OHID is a prerequisite to access the OFIRMS system in production. The vendor staff can <u>register and</u> <u>get a new Ohio ID(OHID)</u> or use an existing OHID account.

Steps:

If users have registered with OHID, follow these to register with the fire department.

Step 1: Launch the portal by clicking the URL below and then click the **Register | Sign in** button.

• Production Link: <u>https://sfmengage.com.ohio.gov</u>

- Vendor Company Name
- Vendor Doing Business As vendor name
- Mailing Address
- Website
- Are you going to submit OFIRMS direct incidents for your Fire Department(s)?
 - Yes Yes indicates that the Vendor will be uploading the Incident Files in the system on behalf of all associated fire departments.
 - No No Indicates that the the Vendor will not be uploading the Incident Files for any of the fire departments that they are associated with. The Fire Department users will be uploading the incident files in the system.
 - o Important:
 - This question determines the vendor's choice for the OFIRMS system, and it cannot be set differently for each fire department a vendor will work with. That means if a vendor reports incidents on behalf of one fire department, then the vendor is committing to do it for all associated fire departments and vice versa.
 - Irrespective of preference for uploading incidents, the vendor must complete the registration process as described in the <u>overview</u> section.
- Contact Information
 - First Name
 - o Last Name
 - o Email
 - Phone Number
- Vendor NFIRS Registration Details <u>NFIRS</u> registration details are a prerequisite for OFIRMS registration.
 - Software Name
 - Software Version
 - NFIRS Vendor Identification Number
 - $\circ \quad \text{NFIRS Software Identification Number}$
- Does your software support NFIRS Version 5.0?

Step 5: Upon submitting the form, the system will show a confirmation message and number for tracking purposes. The request will go to the Fire Prevention Bureau for approval.

Ohio State Fire Marshal	Carol T 🗸
Please log out and log back in to see status. Please refer to Service Request Number OVR-2383066 for future reference.

Figure 5: Vendor Dashboard before Approved for Testing

3 For Vendors Approved for Testing - How to Validate/ Test Incident flat files

Post Registration, the Vendor will be approved for testing. In this phase, the vendor will upload the test Incident file generated from the Vendor Software in OFIRMS. The test files will be validated by the OFIRMS system and give feedback immediately to the Vendors.

Important: The Ohio Division of State Fire Marshal must approve all NFIRS software vendors prior to use by Ohio Fire Departments per the Ohio Fire Code 104.6.3.1 and the Ohio Administrative Code 1301:7-7-01.

We require all vendors to register on our OFIRMS system and upload valid incidents that cover all of the incident series within NFIRS.

The OFIRMS system will automatically validate your incidents. If your incidents have critical errors, you must repair your internal validations to conform to NFIRS 5.0 specifications 2015 editions outlined in the NFIRS Design Documentation Relation Edits and all NFIRS rules.

Once you have successfully uploaded the required incidents without critical errors, we will approve your status in Ohio. This means fire departments within the state will be able to use your software.

If you report for your customers, no activity is also required to be reported. Our system does not allow type 3 incidents indicating "no activity". You have access to a button on your incident screen that allows you to enter a "no activity" report for the month the fire department had no incidents. If you have chosen not to do this, it is YOUR responsibility to communicate this to your departments. **DO NOT ADD NO ACTIVITY** if the fire department had incidents during the month of any incident type. This is considered a fraudulent report.

We recommend you review the Ohio Fire Code section 104.6.3 to familiarize yourself with reporting requirements within the state and the timelines required.

Step 1: Once the registration is approved by the FPB, the vendor needs to test the flat files for the listed incident types using the Test Upload screen. Log out and log in again in case the Test Upload menu is not visible at the top. These are the required incident types to be submitted for validation:

Incident Type	Comments
111 - Building fire	without casualties and with the Fire and
	Structure Fire Modules
111 - Building fire	with casualties (both civilian and fire) with Fire,
	Structure Fire, Civilian and Fire casualty
	modules

The Fire Prevention Bureau will review the files. Upon satisfactory review of uploaded files, the bureau will approve the request. In case of inadequate incident files or files with critical errors, the bureau will provide suggestions and the vendor has to resubmit the files after making necessary updates.

4 For Approved Vendors – How to associate with Fire Department

If a Vendor's software is used by a Fire Department to generate the incident files that will be uploaded to OFIRMS, then the Vendor must associate with the fire department and await the Fire Chief's and Fire Prevention Bureau's approval. Once you have this, the incident files generated by the Vendor's Software will be accepted by the system for the associated fire department.

Only an OFIRMS Approved Vendor can request access to Fire Department. Follow the below steps for registering with a Fire Department.

Step 1: From the **My Fire Departments** screen, click on the **Request FD Access** button. This will open the OFIRS Vendor FD Access Request form.
